

FREEDOM ALLIANCE, **LLC**

– A VETERAN OWNED COMPANY –

Our Mission

November 2018

Our mission is big. It is bold. It is patriotic and timely. It is rooted in preserving individual freedom while teaching America's true historic founding principles to our youth!

We will build the Monument to Enduring Freedom on America's West Coast at a location close to the same latitude of the Statue of Liberty – 40 degrees North latitude. It will stand the same height as Lady Liberty – 305 feet tall. It will be crafted from copper or bronze. It will be engineered with the latest techniques to withstand earthquakes of any intensity. America's two founding principles of Liberty and Freedom will be represented on our East and West coasts, declaring to our citizens and the world that we will forever stand together in defense of these founding principles.

The Monument to Enduring Freedom will be our country's clarion call to all freedom loving people – those who choose individual rights over government excess and overreach, who choose to honor God over the arm of man, and who choose democracy over tyranny.

Lady Liberty ***and*** Brother Freedom will stand as proud sentries to American Exceptionalism.

Together these two symbolic companions of Liberty and Freedom will highlight America's quest to enshrine and protect '*life, liberty, and the pursuit of happiness*' for all her citizens.

Once built and dedicated, the on-going mission of the Monument to Enduring Freedom will be to provide both on-site and educational outreach programs that teach the founding principles of America to current and future generations.

The time to build the Monument to Enduring Freedom is now! This is the cause from which we will not retreat. We stand as a non-partisan, pro-patriotic, grassroots movement of private American citizens... You are invited to join us in this historic and timely undertaking.

Onward and Upward
